- CodeSource® can be installed on an Individual PC or on a Network Server
- Download to Tiger SHARK™, Blue SHARK™, CodeMax® and ITL
- Annual Updates keep you current with the latest code information
- Knowledgeable and Friendly Technical Support

From the leader in locksmith software HPC's CodeSource®, **the ultimate code retrieval program** is actually 8 programs in 1! We all know the importance of offering code-cut keys; it is what separates key cutters from locksmiths. At the heart of every locksmith shop is the code program, a vital aspect of its operations. HPC's CodeSource® is the **most comprehensive, user-friendly code retrieval program on the market today**! It has a database of millions and millions of codes that can be accessed quickly and easily. The Windows® operating system allows for quick maneuvering through the program with the **point and click method or by clearly marked "hot keys." CodeSource® makes looking up a code completely effortless**. There is no need to have extensive computer knowledge to run the program, simply follow the instructions on the screen. If you have questions, **on-screen help is available at the touch of a button**. CodeSource® allows you to search for a code in a variety of ways: Blitz™, Switch Blitz™ or The Punch Machine™ code card number, manufacturer name, key blank number, DSD (Depth & Spacing Data) number, application or vehicle model. With any or all of this information, the system will find the code that you need.

For maximum computing power choose CodeSource® for your PC; it is **8 different programs in 1**!

Code Search - The versatile search function instantly searches through millions of codes. Search by any combination of key code, lock manufacturer, vehicle manufacturer or model, key blank number or code card number.

Featured in CodeSource® Lite and CodeSource®!

Code Specifications - The specifications screen provides all the information needed for cutting keys on any HPC Key Machine including the code card, key blank, jaw, cutter and of course the bitting. The depths and spaces are listed in inches or millimeters. The actual key specifications are needed if you are using a micrometer machine or need to check the measurements of a key.

Custom Codes - Create your own code series to keep track of your own keys. If you have a proprietary lock you also can store the depth and space data in CodeSource®. From there you can access all of the key cutting information, including printing custom code cards

Featured in CodeSource® Lite and CodeSource®!

Search by Bitting - When presented with only a piece of a broken key, enter the known cuts and CodeSource® will display all codes and bittings that contain partial bitting. If you do not have the code number, it is possible to remove and decode the door lock. By entering the cuts from the door lock you can quickly find all the possible bittings for the ignition. The innovative bitting tree offers multiple sorting options for all of the possible bittings minimizing the number of key blanks needed to cut all possibilities.

Key Blank Cross-Reference Most locksmith shops have hundreds of different key blanks, and there are several manufacturers offering replacement blanks. The comprehensive cross-reference in CodeSource® makes it easy to identify suitable alternatives. There is even a field to record the location of each key blank in your shop, allowing you to quickly find the blank you need.

Print Code Cards - HPC's Blitz™ can be found in practically every locksmith shop, and with CodeSource® you can have the capability of printing any code card quickly and easily. Your work does not have to stop because you cannot find the correct card. A simple click instantly prepares a code card, that is ready to print for:
- Blitz™ and Switch Blitz™
- HPC's Punch Machine™
- Pocket Sized Key Decoder

The electronic version of the Interactive Car Opening Authority® is included in the full version of CodeSource®. With opening techniques for the last 15 years of every car, truck and SUV on the road, this is the **leading vehicle entry manual and reference guide.** Through clear, concise diagrams each opening technique is explained. There is **also in-depth information for over 100 vehicles**, including ignition, anti-theft, air bag and sensor location, roadside assistance numbers and more. Detailed photographs show specific opening techniques and lock removal procedures.
Be ready for any lock-out you are called to open!
